Karna International proudly introduces a range of knobs and inserts designed for different applications. These products are combination of plastic molding and metal embedding. Different materials are demanded by clients. We cater to diverse material requirements, including: PPCP (Polypropylene Copolymer), nylon, carbon steel, stainless steel, brass, etc.

Having equipped with an adequate tool room and injection molding tool room facilities, we are prepared to handle both standard and custom designs.

We welcome inquiries for existing products and new design concepts.
